

Greeting Hiring Manager at UltraMobile,

Hope you and your family are staying safe and doing well during this difficult time. The reason I'm reaching out is because I am interested in the Software Engineer I position at UltraMobile. I learned about the company and the position from LinkedIn.com. I would like to use my current experience and skills at your company in order to deliver successful projects to your clients. With the qualifications that you are seeking, I would be a strong candidate for the position.

Through my previous work experience at De Anza College Computer Science Lab, I helped my peers learn best debugging practices. This opportunity taught me to communicate thoroughly and effectively, so we could quickly understand code's functionality and find their logic errors. Additionally, I led two groups of developers in my Vietnamese Youth Organization and Artificial Intelligence @ UCI club to create our organization's website for community outreach. My Vietnamese Youth Organization website nearly doubled in parents' engagement and increased youth participation in organization's events by 70%. My website for AI@UCI attracted more than 500 students to our weekly educational email.

These two projects sparked my interest in web development which led me to start several other projects for fun and learning purposes. My latest project is a SpotifyBrowser Web App that focuses on creating user friendly UI and UX. I want to create a more attractive landing page for Spotify. The website would allow users to browse for music and track their most like artists, songs, and playlists. SpotifyBrowser is developed with Angular, Bootstrap, and Node/Express. With experiences learned from this project, I can help your company develop a world class product that is user friendly.

You can learn more about my projects at henrykhoanguyen.github.io or view my GitHub repos at github.com/henrykhoanguyen

I would love to get on a 15 minutes call to chat more. My resume is enclosed for your review. I can be reached anytime at phone at 408-712-2354. I hope to hear from your soon and thank you for your time and consideration.

Best,
Khoa Nguyen
